

Sustainable Transport Offerings for Faith Sites in areas of poor air quality

STEP 1

SIGN UP TO THE LOCAL TRAVEL NETWORK
Complete the application form and provide us with some initial information about travel to your site and start receiving updates.

Membership opens up eligibility for funding and assistance and includes a free subscription to our e-newsletter full of local faith and sustainability events, offers and case studies that can be forwarded on to your visitor community.

STEP 2

WESTTRANS SITE VISIT

Arrange a time for us to visit you and look at your site in more detail. We will discuss any transport issues or problems you have and decide which of our services can help you.

STEP 3

RECEIVE TRANSPORT ASSISTANCE

We will offer you a package of travel assistance that is tailored to the needs of your site. It can include some or all of the following free transport services.

Cycling

We can provide **bike mechanics** (Dr Bike) for events and deliver **cycle and bike mechanics training courses** for groups or individuals in order to encourage visitor cycling. We can also provide assistance installing **new cycle parking facilities** and instruction on local **cycle hire docking stations**.

Bus/Tube

There are also a limited number of **pre-charged oyster cards** available to encourage visitors to try out public transport as an alternative to car travel.

Travel Information

Hard copy and electronic travel maps can be produced from templates in a range of sizes to promote and encourage the most sustainable travel options available to site visitors.

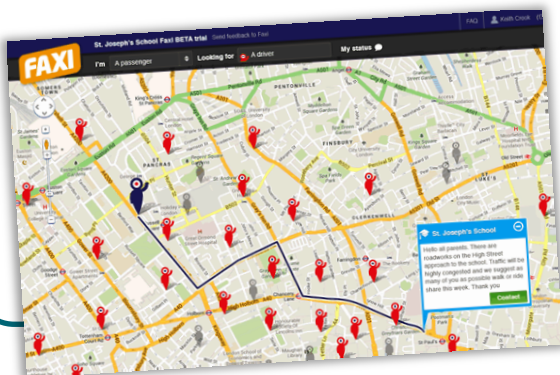

Minibuses

We can provide access to special community transport services and minibus driver training courses to help improve accessibility for those visitors whose travel options are more restricted.

Car & Journey Sharing

We can provide you with a free licence to a community based car and journey sharing website to make lift and ride sharing easier and safer for your visitors.

Air Quality Monitoring

All sites who wish to engage visitors in air quality monitoring can take part in the LSX 'citizen science' project to measure local air quality. Participants will be provided with an air quality monitoring toolkit for use on site.

STEP
4

MATCH FUNDING OPPORTUNITIES

For larger projects such as pool bikes or changing rooms, we can provide funding on a match funding basis.

WestTrans offer match funding opportunities for innovative sustainable travel initiatives that encourage further engagement in active travel.
